Throughout the course of my medical career, I have been actively involved in the education of students both in Athens and Yale University, as well as in all educational activities with case presentations, journal clubs and educational lectures.

I participate actively in the annual undergraduate program of elective courses in "Hematology" from 2005 to today. I also participate in the undergraduate program for students of two Internal Medicine Departments of our Hospital, both with lectures and bedside training.

As a Lecturer and Assistant Professor I have been actively participating in the training of Hematology Fellows through everyday clinical practice, lectures and courses.

During the last 10 years (2005-2015), I have given approximately 50 lectures on various subjects of hematology for medical students and Hematology fellows in Hospital lectures and courses, at the annual Educational Meetings of the Hellenic Society of Hematology, the Lymphoma Working Party of the Hellenic Society of Hematology and the Hematopoietic Stem Cell Transplantation Working Party of the Hellenic Society of Hematology. I also participate regularly in the annual postgraduate seminar "Neoplastic Disease in the human. Modern clinicopathologic diagnosis and research" organized by the University Pathology Department.

E. CLINICAL AND LABORATORY EXPERIENCE

Throughout the course of my medical career, clinical – mainly - and laboratory work - to a lesser extent - were the focus of my interest, in order to provide health services to patients according to the respective positions I held. In all positions, I have fully participated in the On-Call program. I have been responsible for the diagnosis and treatment of a significant number of in- and outpatients with a wide variety of hematologic diseases.

During my compulsory rural practice, I worked in the Hemodialysis Unit of Chalkida Hospital and Gained experience on taking care of patients with chronic renal failure, as well as patients with end stage renal disease treated

with dialysis. I was the responsible physician for the afternoon shift under the supervision of the Director Dr Solomakou.

During my residency in Internal Medicine in Sotiria Hospital, I gained expertise on treating critically ill patients in the Intermediate Care Unit and on patients with various diseases within the Internal medicine ward. I fully participated in the on-call schedule.

During my fellowship in Hematology I was responsible for a significant number of inpatients with acute leukemia and various complications of hematological diseases. I was trained particularly in the field of lymphoproliferative disorders under the supervision of professor GA Pangalis. I also gained experience in the field of hematopathology, namely in interpreting blood, bone marrow, lymph node smears, cytochemistry and flow cytometry. More specifically, I was responsible for setting up and performing the flow cytometry studies in patients with lymphoproliferative disorders.

During my residency in Clinical Pathology and Laboratory Medicine at Yale University, I have fully participated in all clinical activities and the On-Call program. I was responsible for the interpretation of various diagnostic laboratory tests for patients and for troubleshooting both technical and clinical problems.

More specifically, during that time, I practiced in the following areas:

- A. Blood Bank: blood donation, collection of autologous blood, hematopoietic stem cell collection and patients' monitoring, erythrocyphereseis in patients with sickle cell anemia, plasmapheresis in patients with thrombotic thrombocytopenic purpura, myasthenia Gravis and other diseases, recording and investigation of transfusion reactions, blood crossmatch and immunohematology, laboratory investigation and monitoring of the hemolytic disease of the newborn.
- B. Hematology Laboratory: I participated in the investigation and diagnosis of hemoglobinopathies and thalassemia, various coagulation disorders (lupus anticoagulant, clotting factors inhibitors, hemophilia, etc.), hypercoagulability states (antithrombin deficiency, protein S and C, etc), and platelet disorders with platelet aggregation tests. Moreover I gained experience in the interpretation of blood / marrow / lymph node smears and flow cytometry, as well as I resolved problems of automatic blood

analyzers. I was also involved in the interpretation of specialized tests, such as Kleihauer-Betke, etc.

C. Chemistry Laboratory: I learned the operating principles and troubleshooting of automatic analyzers, methods of determination of all biochemical tests, while I have gained significant experience in toxicology, both in the laboratory and in the clinic, since this department was a reference toxicology laboratory.

D. Microbiology Laboratory: I practiced on identification and culture of various microorganisms.

E. Virology Laboratory: I practiced on methods for identification of various viruses, by cell culture, immunofluorescence, ELISA and Western Blot, viral load for hepatitis C virus and HIV.

F. Molecular Biology Laboratory: I dealt with the interpretation of various molecular tests, such as immunoglobulin heavy chain and T-cell receptor rearrangement, cystic fibrosis, factor V Leiden, etc.

During my work in the Department of Bone Marrow Transplantation at the City of Hope National Medical Center, I had the opportunity to be exposed to multiple and specific issues of hematopoietic stem cell transplantation. I gained experience in the process of stem cell collection, cryopreservation, and photopheresis for chronic graft – versus - host disease and cutaneous T - cell lymphomas. I have participated in the process of bone marrow collection from related and volunteer donors, since City of Hope was a Volunteer Donor Marrow Collection Center. I also attended meetings of the selection program of unrelated donors according to HLA- compatibility, since a section of the NMDP (National Marrow Donor Program), was established in the Institution where I worked. I was also briefly exposed to the methodology and interpretation of karyotyping, fluorescent in situ hybridization, HLA-typing by molecular techniques (SSOP, SSP, and sequencing) and chimerism studies with the technique of short tandem repeats.

In my present position, I take care of a significant number of outpatients (80 patients per week), and inpatients. I am also responsible for the Stem Cell Collection and Autologous Transplantation Program and the Stem Cell Laboratory in our Hospital. During working hours, my time is shared between clinical and educational activities. My institution has not assigned any

dedicated protected academic time for research/writing to me. Thus, my research and academic work is performed after my official hours.

F. ADMINISTRATIVE AND ORGANIZING EXPERIENCE

I have been a member of the Organizing Committee of:

- the 7th International Chronic Lymphocytic Leukemia Working Group
- the Postgraduate Seminar of the European School of Oncology on Leukemia and Lymphoma in 1997
- the 2013 International Athens Lymphoma Seminar in October 2013.

I am the main organizer of the upcoming 2015 International Athens Lymphoma Seminar in October 2015.

During my residency at the Department of Laboratory Medicine, Yale University, I was assigned the Chief Resident position.

In my current position, I organized and expanded the Mobilization, Collection and Autologous Hematopoietic Stem Cell Program, the Stem Cell Laboratory and the electronic patient database. I have been recently appointed as the Scientific Head of the Transplantation Unit.
